This map was produced by the West Virginia Department of Transportation (WVDOT) pursuant to the Federal Highway Administration's (FHWA) requirements for road inventories and is intended for use by state and local agencies and the general public as a reference tool for identifying and planning transportation corridors. The map data is primarily sourced from the WVDOT's Transportation Information System (TIS) and aerial photography. The map does not include all transportation features and does not show all land uses and properties.

Kilometers

Coast

Water bodies

Highway

Railroad

Urban area

Rural area

Presented to the public on this map are the following transportation features: highways, railroads, water bodies, urban areas, and rural areas. The map data is subject to change, and for the most current information, please refer to the WVDOT's Transportation Information System (TIS).
