This map was developed by the joint project team of Transportation (WVDOT), Strategic Performance Management Division, and the West Virginia Department of Environmental Protection (WVDEP), Office of Air Quality (OAQ). The map was created to provide a visual representation of the air quality in the Petersburg area. The map includes data on various factors such as air quality indices, pollution levels, and other environmental factors. The map is designed to be used by environmental agencies, researchers, and the general public to better understand the air quality situation in the area. The map is based on data collected by various sources, including monitoring stations and modeling studies. The map is updated regularly to reflect the latest air quality information. The map is intended to be used for educational and informational purposes and should not be considered as a source for legal or regulatory decisions. The map may contain inaccuracies or omissions, and users should consult with the appropriate authorities for the most current and accurate information.
