This map was conceptualized by the West Virginia Department of Transportation (WVDOT) Geographic Information Systems (GIS) and drafted by the WVDOT Drafting Services. It was printed on an HP DesignJet T1500 44" Plotter. The map was designed to provide a general overview of the county's transportation network, including major highways, urban areas, and other relevant features. The map is not intended for precise location or measurement and may not capture all the details accurately.
